

GVM FINAL AUTHENTICATED SCAN - WINDOWS

Task: authwin

Host: 192.168.100.129

Scan window: 2026-09-28 09:16:27-09:37:01 UTC

Authentication method: SMB

Authentication status: Success

Final result

Critical: 0

High: 0

Medium: 0

Low: 0

Displayed findings: 0

Baseline issue remediated

TCP timestamps

Validation

RFC 1323 TCP timestamps were disabled at the Windows host.

Packet-level inspection was used to review SYN/ACK timestamp behavior.

SMB reachability was maintained as a prerequisite for authenticated scanning.
